DETAILED ACTION

Allowable Subject Matter

Claims 1-5, 7-16 and 18-30 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record fails to show a low-rigidity portion formed in each of the first and second leg portions and demonstrating a lower rigidity than the other portions of the first and second leg portions, wherein the low-rigidity portion is formed at a root of each of the leg portions of each of the pawls, in combination with other specifically claimed features.

Regarding claim 7, the prior art of record fails to show a low-rigidity portion formed in each of the first and second leg portions and demonstrating a lower rigidity than the other portions of the first and second leg portions, wherein if a stress is applied to the pawls via the ratchet in the direction in which the ratchet can turn when the pawls are in mesh with the ratchet such that the low-rigidity portion on the side of the stress buckles, each of the pawls are deflected upon the low-rigidity portion on the side of a turning direction such that the first teeth turn toward the ratchet, in combination with other specifically claimed features.

Regarding claim 12, the prior art of record fails to show a low-rigidity portion formed in at least one of the first and second leg portions and demonstrating a lower rigidity than the other portions of the first and second leg portions, wherein the low-

rigidity portion is formed at a root of each of the leg portions of each of the pawls, in combination with other specifically claimed features.

Regarding claim 18, the prior art of record fails to show a low-rigidity portion formed in at least one of the first and second leg portions and demonstrating a lower rigidity than the other portions of the first and second leg portions, wherein if a stress is applied to the pawls via the ratchet in the direction in which the ratchet can turn when the pawls are in mesh with the ratchet such that the low-rigidity portion on the side of the stress buckles, each of the pawls are deflected upon the low-rigidity portion on the side of a turning direction such that the first teeth turn toward the ratchet, in combination with other specifically claimed features.

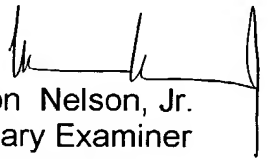

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
